SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In compliance with Applicants' duty of disclosure under 37 C.F.R. § 1.56 and in conformance with 37 C.F.R. §§ 1.97-1.98, Applicants hereby submit the following references for consideration by the Examiner. Copies of the references, except the cited U.S. Patent and Patent Application Publication, are enclosed along with a completed copy of Form PTO-1449.

I. DISCLOSURE

A. U.S. Patents

<u>Patent No.</u>	<u>Inventor</u>	<u>Issue Date</u>
5,408,842	Goto et al.	04/25/95

B. U.S. Patent Application Publications

<u>Publication No.</u>	<u>Inventor</u>	<u>Publication Date</u>
US 2002/0051371 A1	Sekiguchi et al.	05/02/02

C. Foreign Patent References

<u>Reference No.</u>	<u>Country</u>	<u>Publication Date</u>
G 92 16 662.8 U1	Germany	03/11/93
0 621 148 A2	EP	10/26/94
0 730 339 A2	EP	09/04/96

II. DISCUSSION

A. U.S. Patent Application Publication No. 2002/051371

The '371 patent reference was cited as a Y-type reference in a Search Report for corresponding European patent application 03 01 7160. A Y-type reference is pertinent when combined with one or more Y-type references.

B. German Reference No. 92 16 662.8

Based solely on the drawings, the '662.8 patent reference is pertinent because it appears to disclose a circuitry that is in communication with a pulse generator. The '662.8 patent reference was cited as an A-type reference in a Search Report for corresponding European patent application 03 01 7160. An A-type reference is not considered pertinent to patentability and provides technical background.

C. European Reference No. 0 621 148

The '148 patent reference was cited as an A-type reference in a Search Report for corresponding European patent application 03 01 7160. It is believed that U.S. Patent No. 5,408,842 corresponds to the '148 patent reference.

D. European Reference No. 0 730 339

The '339 patent reference was cited as an X-and Y-type reference in a Search Report for corresponding European patent application 03 01 7160. An X-type reference is pertinent when taken alone.

III. CONCLUSION

It is believed that none of these references, alone or in combination, disclose or suggest the invention claimed. However, Applicants wish to make it clear that the disclosure of the above references is in no way an admission that they qualify as prior art. It is Applicants' desire, however, to have these references available in the record for both the Examiner and the public to see. Applicants therefore request that the Examiner review the entire disclosure of each reference and make the above-listed references of record.

Respectfully submitted,

John C. Freeman
